

Tjat to highlight its Messaging Widgets for Plaza Mobile Internet at Mobile World Congress, 2010, Barcelona

Barcelona--Tjat Systems, a leading pioneer in the field of mobile access to Web messaging services, today announced it will be showcasing its Mobile Messaging Widgets on Plaza Mobile Internet™ in the Qualcomm booth at “App Planet” during World Mobile Congress 2010 in Barcelona. In addition, Dr. Oleg Golobrodsky, executive vice president of Tjat Systems, will speak in Qualcomm’s booth at “App Planet” on Tuesday, February 16, 2:30-3 p.m. regarding the dynamic and critically important mobile applications market and the role of mobile widgets in it.

“Tjat shares Qualcomm’s vision of giving consumers a simple way to mobilize their online activities with the best user experience possible. In developing our widgets for Plaza Mobile Internet, we get great support from Qualcomm, making the development process run very smoothly. In a nut-shell, Qualcomm’s Plaza Mobile Internet tools are a great facilitator and a channel to market for us,” says Dr. Golobrodsky.

Plaza Mobile Internet enables publishers and developers, such as Tjat, to develop widgets quickly and easily using open Web standards and tools.

“Tjat’s widgets take advantage of the rich Web experience that Plaza Mobile Internet enables, highlighting the great depth of capabilities possible from within a widget – including Web standards-based user authentication,” said Mitch Oliver, vice president of ecosystem development for Qualcomm.

About Tjat Systems

Tjat is the world leader in delivering mobile access for web messaging services (Instant Messaging, email and Social Networks) to the widest possible subscriber base. As a SaaS (Software as a Service) solution, Tjat services are easy and immediate to deploy, giving users the value, simplicity and localization that are critical for the success of a mobile VAS today. Tjat is based in London, UK with development and support offices in Germany, Israel, Ukraine and Singapore. Learn more about Tjat at www.tjat.com.
