

Opera and Tjat to showcase new generation of mobile messaging widgets at Mobile World Congress

London, U.K. – February 14, 2010 – As part of the ongoing strategic partnership between Tjat and Opera Software, the Tjat Mobile Messaging Widget has been chosen by Opera to be demonstrated in MWC-2010 in Barcelona.

Opera included Tjat IM widgets as a default widget on all Opera Mobile 10 distributions. The award winning Tjat Messaging platform aggregates popular Web messaging services (such as Instant Messaging, Email and Social Networks) into one convenient Widget. Tjat Messaging widgets for Opera are also among recommended widgets for other Opera platforms such as Opera 9.5, 9.7, Windows Mobile and Symbian OS, as well as Opera Desktop 10.2 and up. Tjat widget brings Opera users easy, familiar and feature rich IM access such as MSN, Yahoo!, ICQ, Chikka, AIM and Skype-Talk

Opera Mobile 10 is the browser that is bringing the desktop surfing experience to the small mobile screen, and is one of the first members of the Opera browser family to introduce a new, unified user interface.

“Tjat is proud to become a part of the Opera offering with our shared vision and cutting edge innovation, while delivering unparalleled excellence that Opera Software is synonymous for,” said Gideon Drori, Tjat CEO.

“The Opera Widgets strategy is to improve convenience and usefulness on the mobile platform. By partnering with companies such as Tjat, we are able to provide Opera Mobile users with familiar and popular social networking tools, all within a single application,” said Jon von Tetzchner, Co-founder, Opera Software. “Tjat and Opera share a vision to bring advanced services to mobile phones that are easy-to-use and engaging for the users.”

Tjat widget is demonstrated in both Opera and Tjat booths at Mobile World Congress 2010. Visit Opera’s exhibit at Hall 1, C44 or Tjat booth at Hall 4, Level 1, IMA Pavilion to see Web technology in action on a wide range of devices.

About Tjat

Tjat is the world leader in delivering mobile access for web messaging services (Instant Messaging, email and Social Networks) to the widest possible subscriber base. As a SaaS (Software as a Service) solution, Tjat services are easy and immediate to deploy, giving users the value, simplicity and localization that are critical for the success of a mobile VAS today. Tjat is based in London, UK with development and support offices in Germany, Israel, Ukraine and Singapore. Tjat is a Strategic Partner of Opera Software, delivering Tjat's advanced messaging widgets for Opera Widget environments, for Mobile and any other widget enabled end user device (like video Set Top Boxes and more!).
